

# Coronavirus Quilt

(Approx. 78"x78")

Are you ready for a social quarantine quilt project? I have designed a scrappy, happy quilt for those who want to use up what's in their stash during this time of social distancing.

Block size is 12-1/2" (unfinished).

## Cut Your Fabric

You will need to cut your fabric into 2"x3-1/2" rectangles.

432 light or neutral rectangles, and  
720 dark rectangles (can be darks & mediums)

1 yard of border fabric; 5/8 yard binding fabric

## Sew Your Blocks

Each block consists of 6 "light" units and 10 "dark" pairs.

Quilt requires 36 blocks (6 across by 6 down).

Begin by sewing a dark rectangle to another dark rectangle along the 3-1/2" side. Do this with all of your dark rectangles and you will have 360 pairs.

Repeat with light rectangles; you will have 216 pairs.

Now, following the block diagram above, sew your pairs into rows of 4, and sew your rows into a block — take care to follow the color placement and pair orientation in diagram. Repeat for 36 blocks

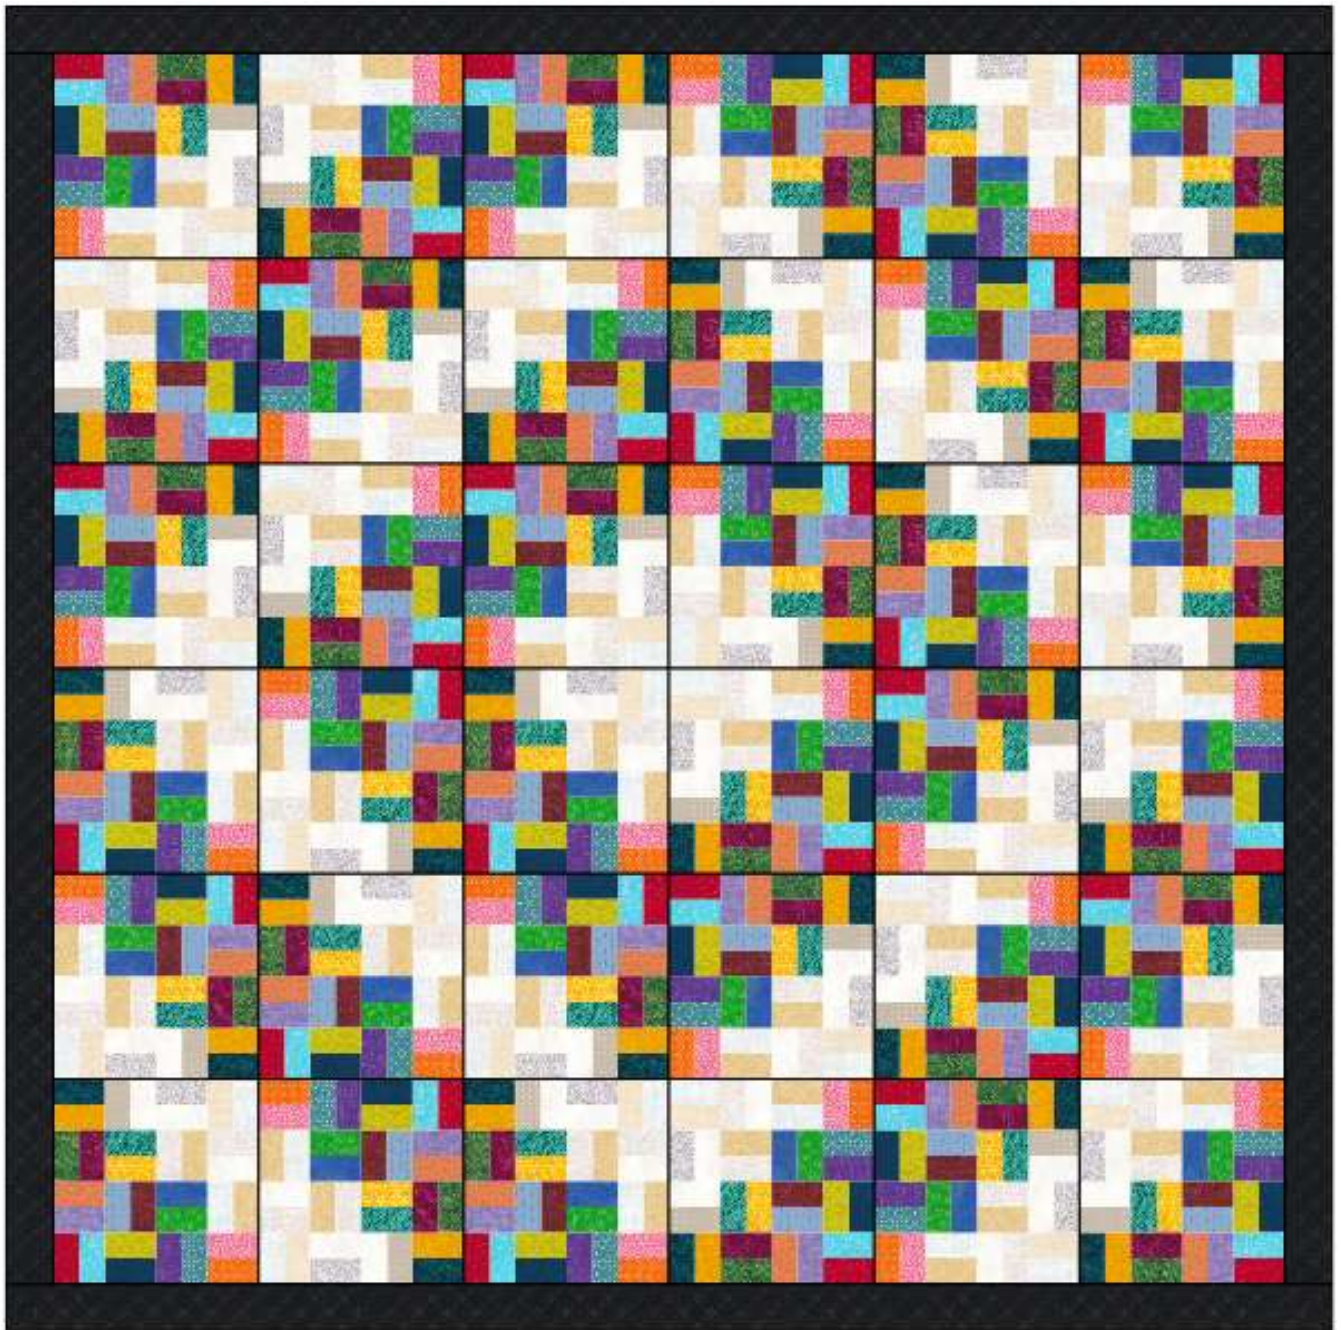

## Make Your Quilt

Sew your blocks into rows of 6, and sew your rows into a quilt following the quilt diagram on next page — again taking care to follow the color placement and block orientation on the diagram.

I added 3" borders: Cut 8 strips at 3-1/2".

Binding takes 8 strips.
